Information

IMG's onscreen keyboard utilities and designer tools are used by tens of thousands of equipment manufacturers, software developers, systems integrators, VARs, corporations, agencies and organizations worldwide. IMG's products run 24 hours a day, 7 days a week, on some of the most advanced and critical systems in the world.

Emergency Response Systems

Used by Homeland Security, Police, Sheriff, Fire, Ambulance, and Emergency Rescue in vehicles, planes, helicopters, and boats.

Transportation / Warehousing / Manufacturing

Used in trucks, trains, field service vehicles, mobile GIS / GPS, on forklifts, cranes, inventory carts, large scales, and even programmable barcode line and ticket printers.

Industrial Automation

Used in industrial automation, process control, HMI, SCADA, shop floor, and ERP / MRP equipment manufacturers and their customers worldwide. Ideally suited for environments that are extremely clean, dirty, or toxic, especially those running SCADA systems.

Food

Used in food research and manufacturing, processing, and distribution where environments require systems that can be cleaned with high pressure equipment. Used where devices such as physical keyboards would be breeding grounds for bacteria and mold, or easily destroyed.

Pharmaceutical

Used in pharmaceutical research and manufacturing, processing, and distribution. Provides operator logging and used in validated systems.

Medical

Used in medical equipment such as MRI's, patient check-in Kiosks, rolling Mobile PC carts, emergency room interactive and surgical systems. Word Prediction options speed up entry and increase accuracy of large medical terms and codes. HIPAA tracking and compliance.

Mobile / Handheld

Used in field service, warehousing, route accounting, and remote data collection systems.

Test and Measurement

Used by test and measurement, instrumentation, analyzers, reference, and lab automation equipment manufacturers and their customers worldwide. The software can be customized and embedded in instruments as part of larger systems.

Utilities

Used by major utilities equipment manufacturers, gas / oil drilling and distribution, mining, electricity, phone, and other services worldwide.

Financial / Stock Exchange

Used by many insurance, brokerage, investment, and financial systems developers and their customers worldwide, including stock exchanges and financial kiosks.

International

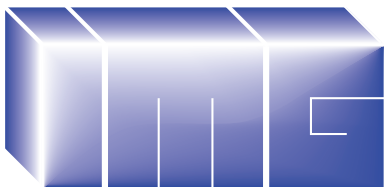

Used throughout the world. Provides a fully integrated, interactive user interface with over 200 pre-built layouts and additional support for custom key, macro, or panel groupings created using IMG's Build-A-Board Keyboard Designer Tool. IMG's software is used in virtually every country that has electricity.

Accessibility

From the beginning, IMG has been dedicated to enhancing its high quality commercial software products by working closely with end-users, teachers, therapists, and specialists to design and deliver powerful, full featured, and reasonably priced computer access software to physically and visually challenged individuals.

Innovative / Applied Technology

Jet engine testing, aircraft data logging, audio / video / network testing, remote field instrumentation, wet / dry materials analysis, industrial oven and refrigeration, respiratory, artificial heart / lung, robotic, vision, automated mailing, solar tracking, defense, golf simulator, cardiac diagnostic, environmental control, analytic, HVAC, x-ray, locomotive control, desalinization, physiotherapy, traffic enforcement, automated press production, telecommunication, leak detection, fire and safety, metrology, high speed labeling, and more. IMG's software can be customized and embedded into virtually any computer driven device and replace physical keyboards.

Innovation Management Group, Inc.

Since 1995, IMG has been the professional's choice for onscreen keyboard and input (pointing) device enhancement utilities of major Automation, HMI, Industrial, Instrumentation, Kiosk, Medical, Military, Mobile, Pen, Ruggedized, SCADA, Tablet, Touchscreen, Handheld, Wearable, and Whiteboard PC system manufacturers and software publishers worldwide.

IMG has also applied its technology to the field of Assistive Technology. From the beginning IMG has worked closely with end-users, teachers, therapists, and AT Specialists to optimize and enhance its commercially successful software to provide physically and visually challenged individuals full computer access.

Catalog # 12401

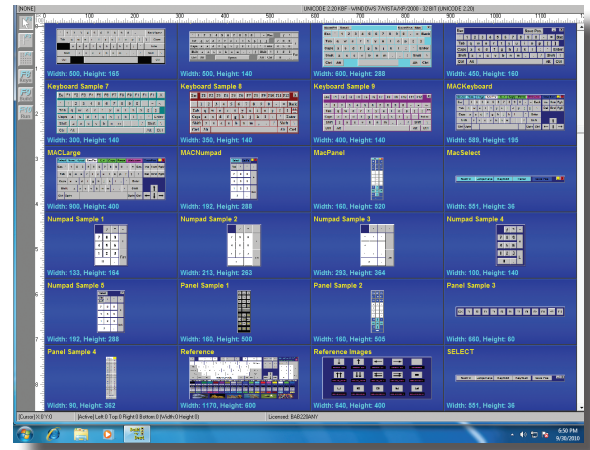

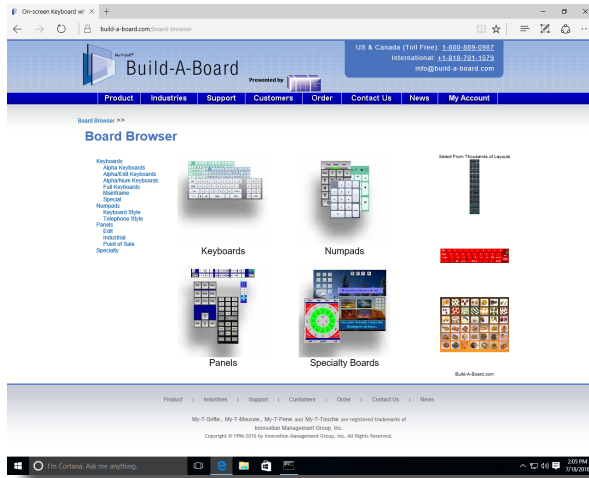

The next generation of onscreen virtual keyboards

- Use Standard Keyboard Layouts or Build your own Custom Layouts
- Developer Friendly Designer / Builder / Tools
- Any touchscreen / tablet / handheld / mobile / ruggedized device
- Online Database of Layouts / Layout marketplace
- Developer & Application Integration support (with Code & Examples in IMG Developer's Kit)
- Multi-Platform Support - Windows / Windows CE, Linux, Unix, Mac OS X
- Royalty Free per device
- Personal, Site, Multi-site, Enterprise and Global Enterprise Licensing

Select your layout . . .

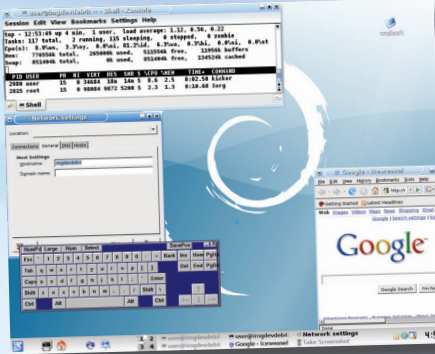

From Online Database

Or From Customizable Samples

Then Deploy on . . .

a Windows Environment

or Linux

or even Mac

These tools & technologies have been created to address customer requests and requirements and continue to evolve to add flexibility and provide easily modifiable examples or ready-made solutions. Create any keypad, keyboard, or replace legacy membrane layouts. Update outdated equipment with new systems utilizing today's technology, while preserving existing methodology and procedures.

Familiar interfaces eliminates the need for additional user-training. Deploy worldwide with international & cultural localization. Customize based on user, application, or process requirements. The flexibility to change keys or layouts as desired enables innovative, user-friendly, secure and effective systems.

OEM versions, Individual Components, Network and Site Licenses are available.

My-T-Soft Family

My-T-Soft onscreen keyboard utilities have been the choice of tens of thousands of OEM's, Systems Integrators, and End-users worldwide since 1993, because of the high level of compatibility, functionality, reliability, and versatility our products provide. Whether we're part of an Automotive, Food, Pharmaceutical, or Steel Plant controller, or the interface to Aircraft Diagnostics, Rugged Military PC, MRI, or Fleet GPS system, IMG utilities help run some of the most advanced and critical systems in the world. Perhaps that's why we're considered The World Standard in Onscreen Keyboard Utilities!

A word from our Developer's Corner on Application Integration

One of the keys to the widespread acceptance of the My-T-Soft Family of onscreen keyboards has been the vast library of code, examples, executables, and libraries available in the IMG Developer's Kit. Access to these resources allow application developers to quickly and easily integrate the required panels and access the utility and functionality of the My-T-Soft software. By eliminating the need for a physical keyboard, new and existing applications can quickly be ported to touchscreen or pen based interfaces. When keyboard input is required, My-T-Soft can be called up with the appropriate input panel for text or numerical input. The ability to easily move, size, position, control, and select different configurations at will provides the necessary components developers need to create a comprehensive and seamless user interface.

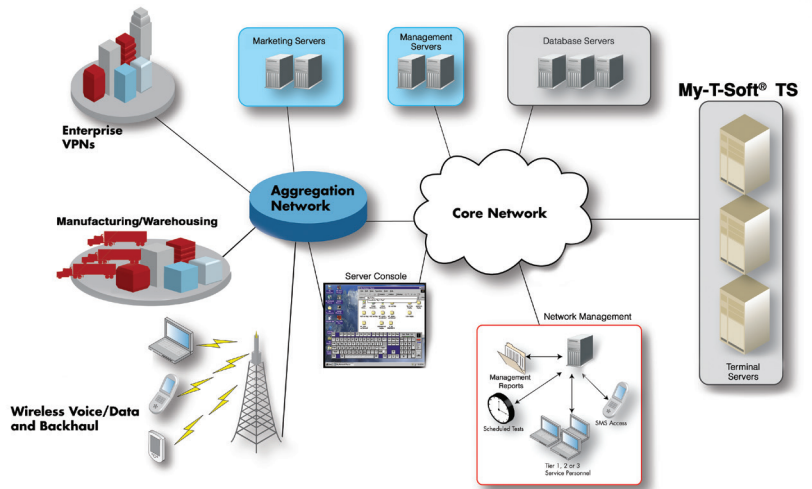

The IMG Developer's Kit has progressed in tandem with the software, primarily driven by requests and the requirements of our customers, by providing an API (Application Programming Interface) for popular development platforms. Along with the current .Net, Java, and other high-level tools such as Visual Basic and MS Access, there are lower level examples, and source code for stand-alone tools and Dynamic Link Libraries (DLLs). In addition to the source code, tools, other types of utilities, and examples, the Kit includes documentation, hints and comments, along with frequently asked questions. The IMG Developer's Kit is included on the product disc, and available for download on IMG's website in the Developer's Corner.

SmartClick

for users that can move mouse cursor, but can't click

- Uses dwell / hover timer approach, with jitter distance setting
- Sends Clicks, Drags, Double-Clicks
- Customizable Floating Palette
- Developed in conjunction with RJ Cooper & Associates
- The Most Complete General Purpose Hover / Dwell Access Tool Available

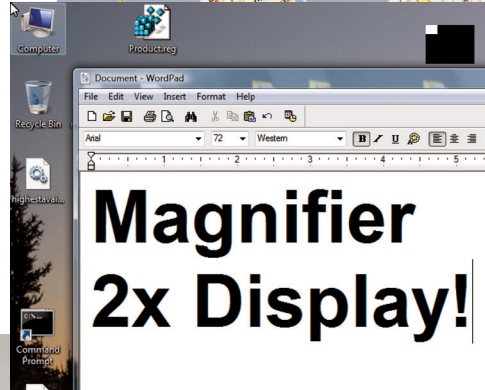

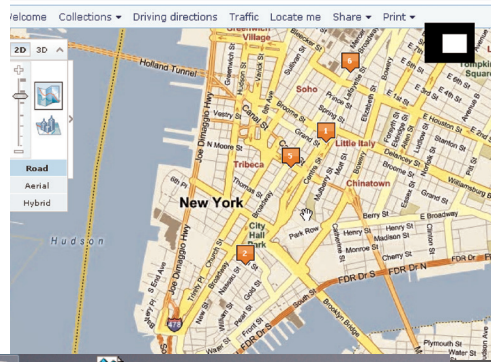

Catalog # 12501

The Magnifier

for people with minor visual impairments

- The First Truly Affordable Full Screen Magnifier for Windows!
- Provides 1x-40x in 0.1x increments
- Hot Key control, Mouse Toolbar, Cursor Locator
- Color inversion, window & lens modes, flexible, easy to use
- The Most Complete General Purpose Software Magnifier Available

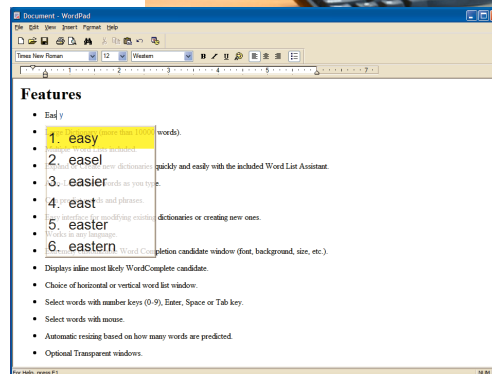

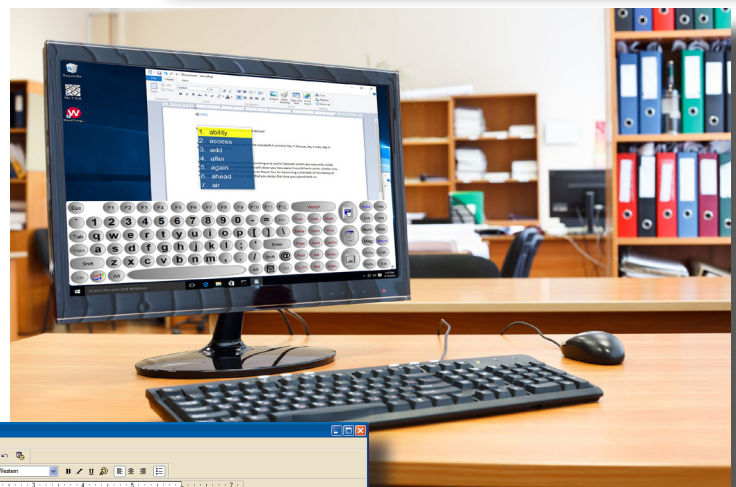

Catalog # 12201
www.themagnifier.us

WordComplete

for the spelling challenged / learning disabled

- Also for medical, legal, scientific, technical writers
- Speeds text entry, increases accuracy
- Build and Manage word lists easily
- The Most Complete General Purpose Word Prediction / Word Completion Tool Available

Catalog # 12701

IMG Licensing and Annual Support Options

Electronic License

Allows purchase of an IMG software license direct from our website. License direct from the software.

(Annual Product Support Available)

- Download any IMG product (web based demo).
- Install & Evaluate the software.
- License single or multiple systems from the IMG website.

Resellers

License from Reseller website

(Annual Product Support Available)

Purchase License Keys direct or through Reseller Channel

DVD License (Retail License)

Allows purchase of an IMG software license on DVD disc in Retail Packaging (Annual Product Support Available) IMG product on DVD with License Key on Certificate of Authenticity card

Resellers

Master DVD Retail Packaging (Annual Product Support required) Single DVD Master with Single or Multiple License Certificates

USB License

Allows purchase of an IMG software license on USB "Insert and Run Anywhere" USB Drive in Retail Packaging (Annual Product Support Available) IMG product(s) on USB Drive with License Key on Certificate of Authenticity card

Site & Enterprise License

IMG software licenses for Single / Multi-Site, Enterprise or Global Enterprise Keyless DVD or Software Master Licensed to End-User Name & Contact Information (Annual Product Support required)

OEM License (Original Equipment Manufacturer)

Systems Integrator License

IMG software licenses for pre-installed hardware / software systems / OEM Bundling. Keyless licensing available.

Certificate

Master IMG software demo files pre-installed on system License Keys delivered on Certificate of Authenticity cards. (Annual Product Support offered after 1st year of delivery)

Royalty

Master IMG software files pre-installed on system. Keyless (based on unit sales) or Certificates (for bill of materials inventory management) Annual Product Support offered after 1st year of delivery.

Annual Support / Maintenance / Updates

End-Users

Annual Product Support includes phone & e-mail support, maintenance updates, transfers, upgrades. Basic Product Support to End-Users is included for the first 12 months after delivery. Annual Product Support to End-Users is offered at 20% of purchase price for 1 year or 15% of purchase price per year for a 3 year support package. Annual Product Support also includes an online account for license transfer & history, and product updates.

Resellers

Annual Product Support includes: Phone & e-mail Technical and Software Development Kit (SDK) support, maintenance updates, SDK updates, and product upgrades as long as Annual Product Support Agreement is current. Annual Product Support also includes an online account for license transfer & history, and product updates.

Upgrades (Customers without Annual Support plan)

End-Users

Upgrades to current version from previous versions are available

My-T-Mouse®, My-T-Pen®, My-T-Touch®, and My-T-Soft® are registered trademarks of Innovation Management Group, Inc.

Windows Support

IMG has been delivering software for Windows since Windows 3.0. As part of the Microsoft Developer Network (MSDN), IMG has access to all Microsoft platforms, and will continue to deliver the software our customers demand.

Linux / UNIX Support

IMG works in conjunction with LinuxCollections.com to obtain access to the hundreds of distributions available for Linux, FreeBSD, Solaris, etc. In designing software for these platforms, IMG has focused on support at the base XLib level, to allow operation in any system with X11 support, including the popular GNOME and KDE window managers.

Mac OS

Mac OS X Support

IMG is part of the Apple Developer program, and provides support for systems using Mac OS X version 10.2 and higher.

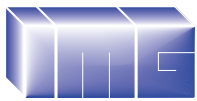

Ongoing development for newer platforms.
(Priority driven by customer demand)

Pricing and Product details available at www.imgpresents.com

USB Insert & Run Anywhere Technology

Run IMG software from a USB Drive.

Great for field service technicians, mobile personnel, and individuals that need to work on different computers at different locations. From home to work to the library to the plant floor to remote field installations. Run any IMG software program using IMG's "Insert and Run Anywhere" USB technology. Nothing installs. No administrator privileges required. Simply insert the drive and the software runs. There are no changes to the system!
