Now you can Point & Click with any Joystick!
Intuitive, Easy, and Fun to Use!
For ALL Windows Applications and Games.
Acceleration, Click, Drag, & Double-Click options.
Assignable Keystroke & Macro features.
Ideal for Gamers & the Physically Challenged.
"FLY" or "DRIVE" the Internet with your Joystick!
Run Windows with any Joystick or Game Controller!

Acts just like a Mouse, Trackball, or any other pointing device.
Joystick-To-Mouse shares the cursor & button controls of the mouse (or other installed pointing device) and is popular with children at home and in schools, avid game players, devoted on-line service/internet "surfers" and the physically challenged or Repetitive Strain Injury (RSI) users.

Works with Any Gaming Device - Joystick, Flight Controller, Driving Wheel, Foot Pedals, etc.
Joystick-To-Mouse works with any USB joystick, game device, game controller, or PC game port devices.

Configuration Flexibility
Easy Setup & Install provide basic operation. Joystick-To-Mouse also provides all types of program options and advanced settings to satisfy the most sophisticated Windows power user.

Minimizes Keystrokes, Clicks, and Menu Selections with simple Macros or Auto-Click.
You can store up to 128 keystrokes in macros assigned to a joystick button, or select from pre-defined functions. The Auto-Click Dwell timer can even send mouse clicks automatically.

Re-assign Keystrokes or Functions to Joystick Buttons
Re-assign any of over 80 mouse button commands (to up to 32 joystick buttons), including click, drag, double-click, Esc, F1, Enter, Delete, and combination keystrokes such as Alt-F4, Ctrl-Esc, etc.
